

Teacher Delivery Report — March 2026

FOR THE PRINCIPAL — PLAIN-LANGUAGE SUMMARY

How is delivery going, *teacher by teacher*?

Every grade-and-subject combination your teachers cover, in full — who's on pace, who needs support, and how each new hire is settling in.

Your school teaches **17 grade-and-subject combinations** this term (3 more have no section running right now). Across the **21 teacher-sections** we tracked, the large majority are doing well: **9 are on track** and **5 are improving**. **3 have some room to grow**, and **4 would benefit from extra support**. In **4 of those subjects**, two teachers of the same grade and subject are getting different results — a useful signal that points to a teacher-specific opportunity, not an issue with the subject itself. Separately, **6 new hires** are being tracked against a typical settling-in curve that reaches full pace by month 4 — a helpful way to spot who might benefit from a bit of extra support early on.
